Job Number: 5043

Job Title: Well Driller

Location: Willmar, MN

Industry: Construction

Relocation Available: Yes, from within the continental United States

Job Type: Permanent/Full-Time

Our client, located in Willmar, Minnesota, is currently seeking to fill the position of Well Driller. If you are a motivated and professional individual, who will improve the efficiency of their team, we encourage you to apply today!

Job Description

This Company is seeking an experienced Water Well Driller who will be responsible for delivering drilling projects ranging from 2" and up to 16" wells, plastic & steel, in glacial drift or bedrock. As a drilling expert you will supervise all other personnel on site and communication with property owner, driller's helper and office staff to ensure timely and professional completion of drilling projects. You will also be responsible for maintaining the trucks, drilling equipment, mechanics, safety regulations, paperwork and logbooks.

Because more wells are located in urban areas, you will have to travel to remote locations daily and spend time outdoors, and instead of a typical 40-hour week and 9 to 5 hours, work is performed until the job is complete. The work is loud and dirty and so you must be physically fit to use the large equipment. You must also have good customer service skills to interact with customers.

Requirements

- Review client requirements and proposed locations for water wells.
- Operate water well drilling rigs and other equipment to drill, bore and dig for residential, commercial and industrial water wells and install well screens, casings and other well fixtures.
- Perform routine mechanical maintenance work on water well drilling rigs and equipment.
- Install, test, maintain and repair water well pumps, piping systems and equipment.
- Perform pumping tests to assess well performance.
- Provide other drilling services, such as repair or dismantling of the existing water well structure.

Responsibilities

- Review client requirements and proposed locations for water wells.
- Operate water well drilling rigs and other equipment to drill, bore and dig for residential, commercial and industrial water wells and install well screens, casings and other well fixtures.
