Our client, located in Mexico, Missouri, is currently seeking to fill the position of Support Services Technician. If you are a motivated and professional individual, who will improve the efficiency of their team, we encourage you to apply today!

## Job Description

This individual provides electrical, electronic, mechanical and hydraulic repair and maintenance support, including some fabrication. Performs various support activities for die maintenance and machine shop functions.

## Requirements

- High School diploma or GED.
- Certificate from Technical/Trade School or relevant work experience to qualify for industrial “journeyman” status in the electrical, electronic, or mechanical fields.
- 3+ years of experience in the die casting industry.
- 2+ years working with Makino.

## Responsibilities

- Repairs and maintains electrical, electronic, mechanical and hydraulic functions of the operating die cast machines including preventive and predictive maintenance.
- Operates various machine shop pieces of equipment including lathes, drill presses, saws, hand tools meters, gauges, micrometers and computers.
- Programs PLCs for the die cast machines and trim press operations as well as electronic, electrical and mechanical troubleshooting.
- Provides support to die maintenance and machine shop work areas.
- Communicates to supervisor and/or other shift leaders to ensure continuity of ongoing projects, repairs, and maintenance.
- Performs all functions in accordance with Company safety procedures and with OSHA requirements.
- Contributes to and supports the existence of a positive work environment through personal involvement by communicating, interacting and behaving in a manner that promotes productive relationships with coworkers, supervisors, customers, and others with whom such relationships are important to the success of Company operations.
- Performs other duties as assigned.

## Competencies

- Strong technical skills and knowledge of repair and maintenance for Hydraulics/Pneumatics, Mechanical, Electrical, Automation, and CNC systems.
- Ability to read and interpret blueprints, electrical schematics and hydraulic diagrams and use the proper instrumentation necessary to repair and install machinery.
